

STAR-MOUNT SYSTEMS

Please Follow these Steps in the Pictures shown

If you have any question, please contact us at

STARMOUNTS@YAHOO.COM

You can also Call or Text Brandon @ (760)402-5417

THINGS NOT INCLUDED THAT YOU WILL NEED TO PROCEED:

1. GORILLA GLUE: CLEAR GRIP (Picture on Page 54)
2. DREMEL TOOL (Suggested 4300 Series) Includes all Bits needed in this kit. (\$129 at Home Depot)
3. DREMEL 1/8" (3.2mm) Multi Purpose Cutting Bit (Dremel #561) and Sanding Disk (Picture on Page 2 and 3)
4. Razor Blade
5. Flush Cuts or Cutting Pliers
6. Flat Head Screwdriver
7. Hammer
8. TIME and PATEINCES! Take your time! A mistake could lead to a damaged Dishy!

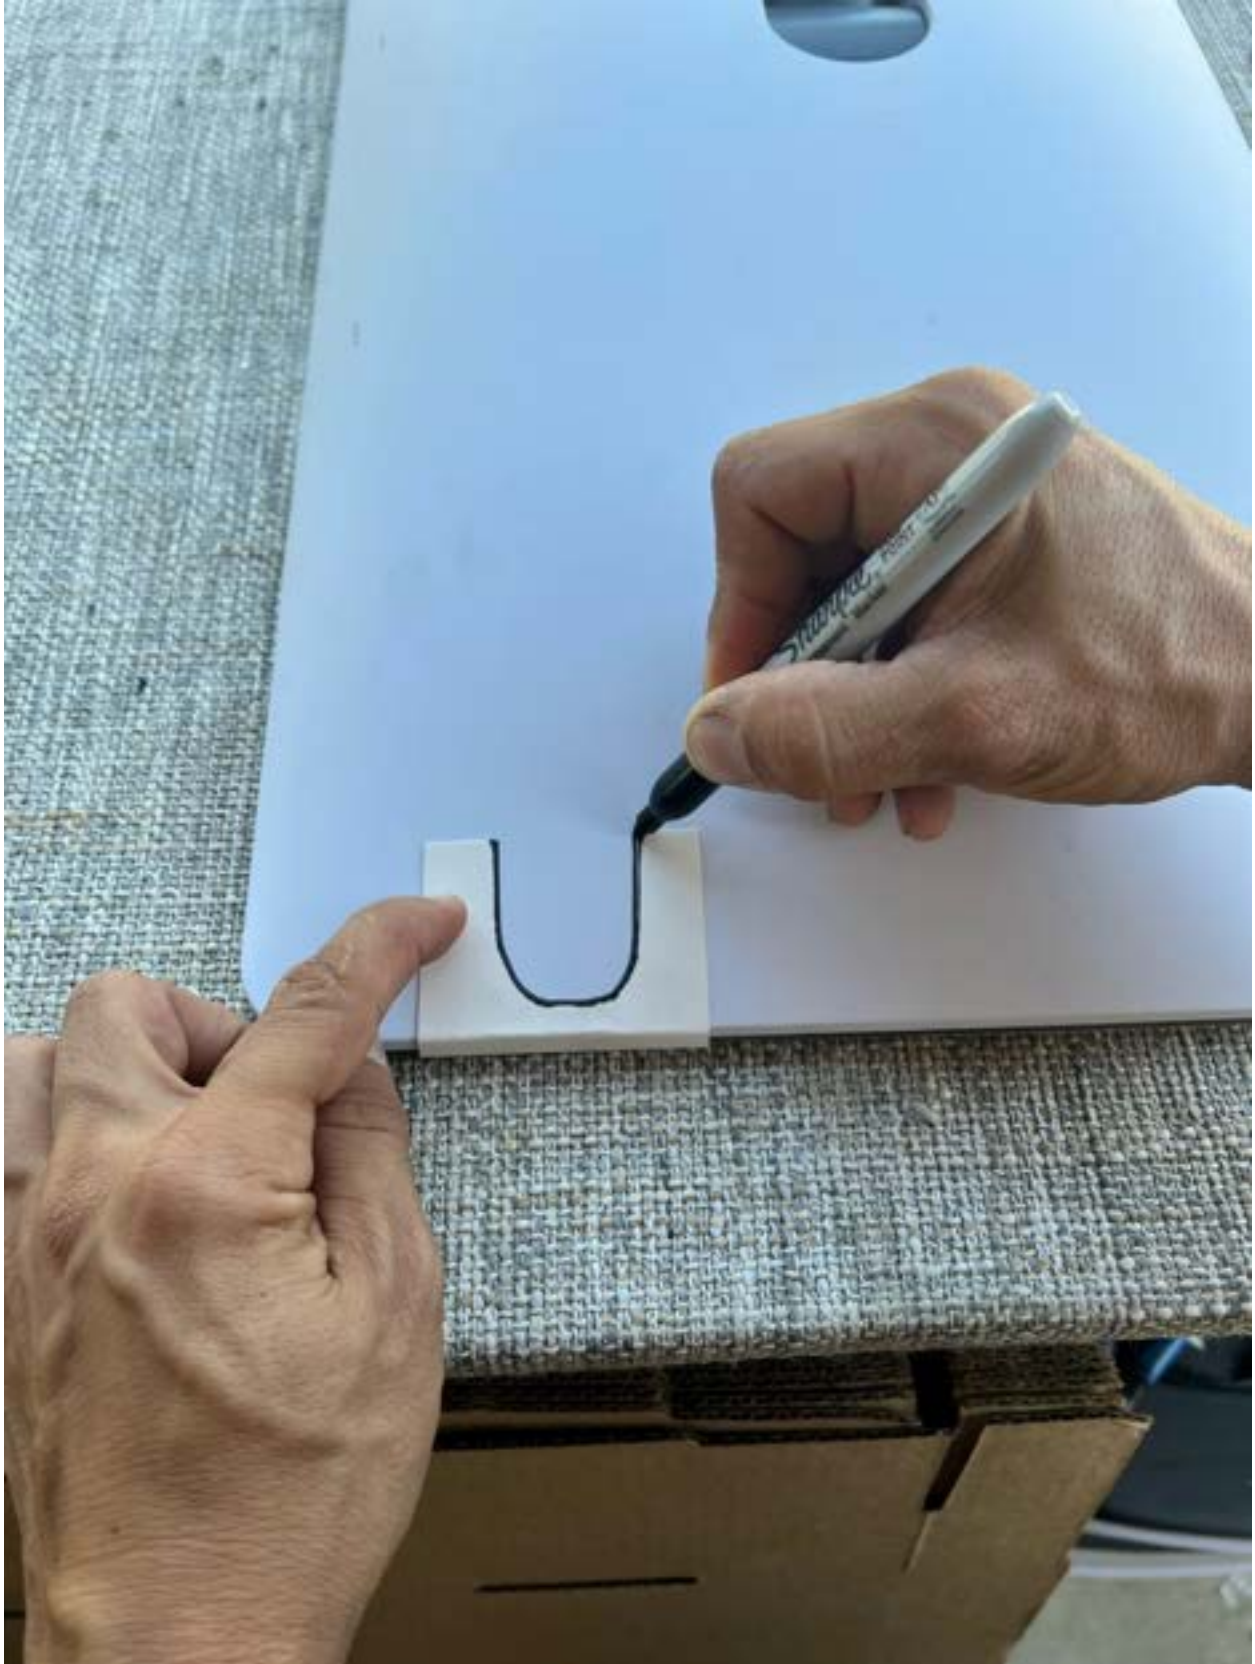

GOOD LUCK! PLEASE FEEL FREE TO CONTACT DURING THE PROCESS IF YOU NEED ASSISTANCE!

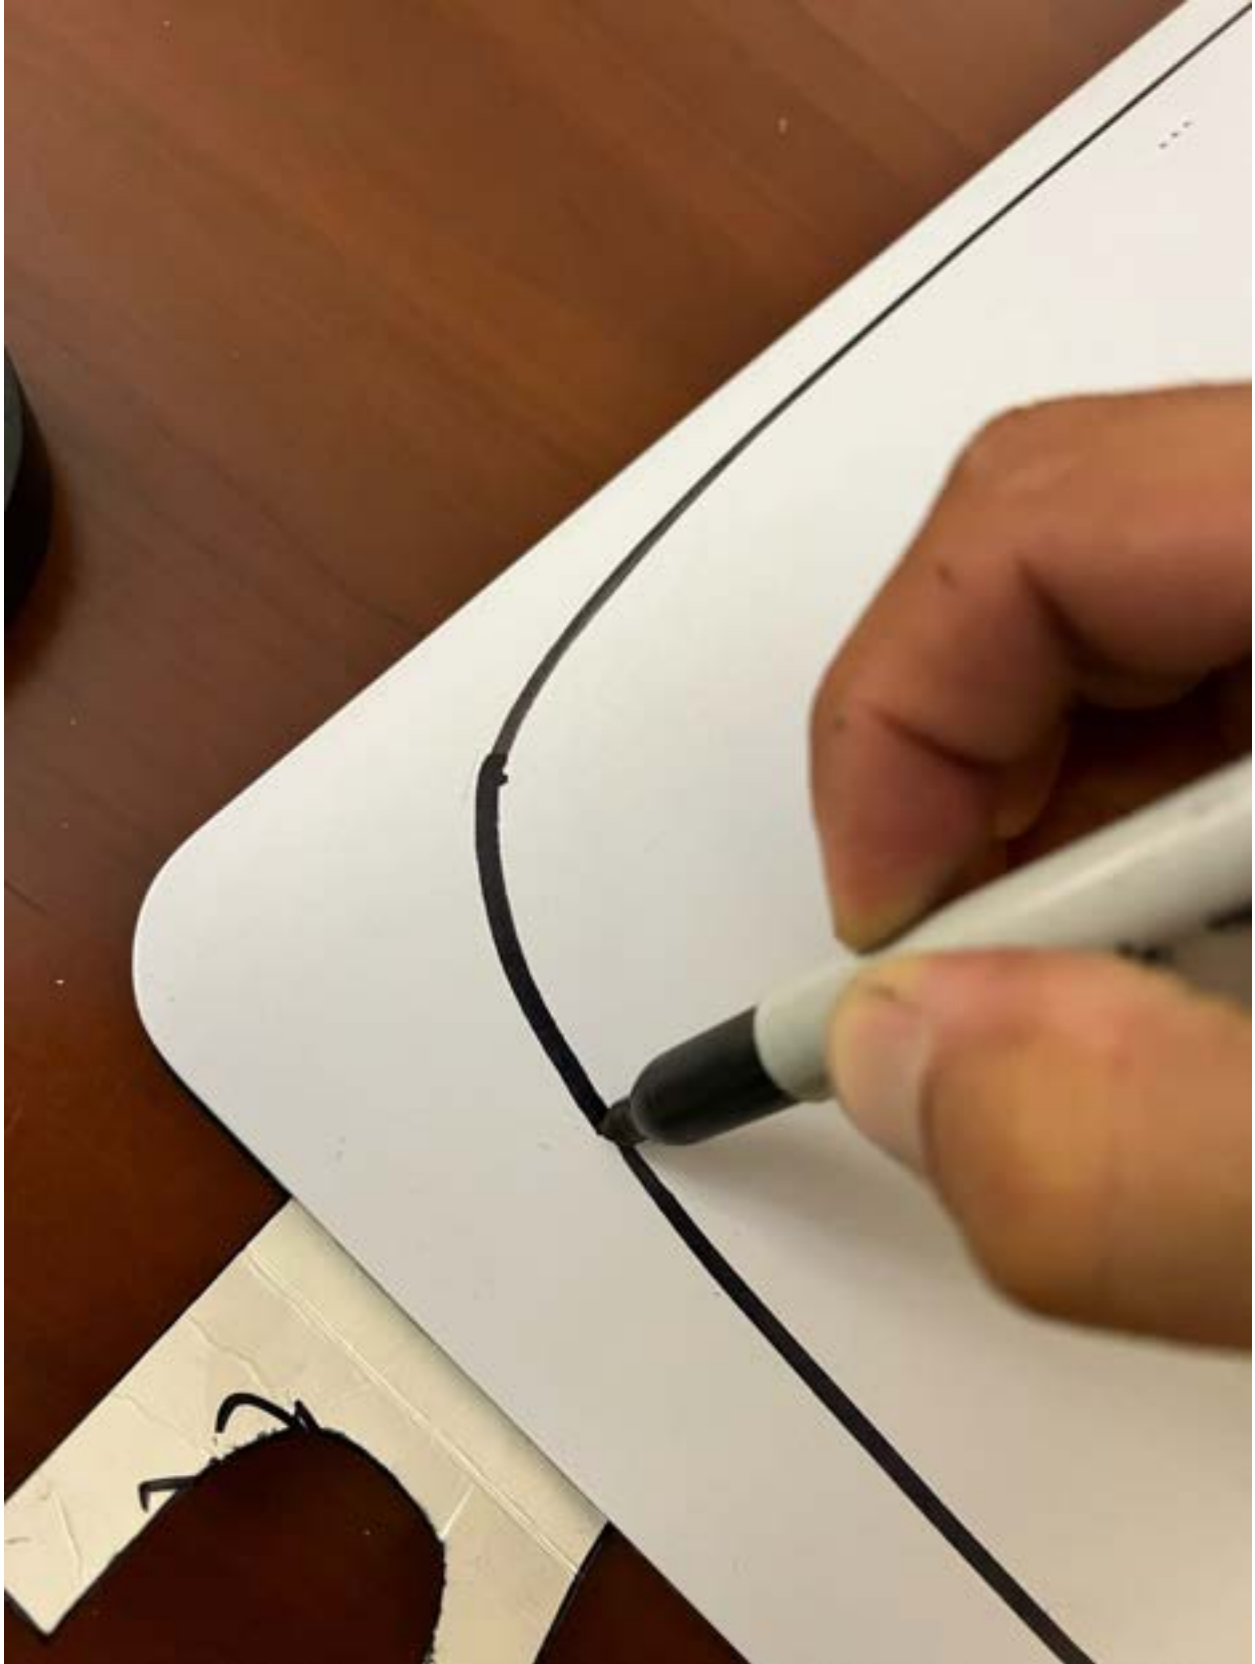

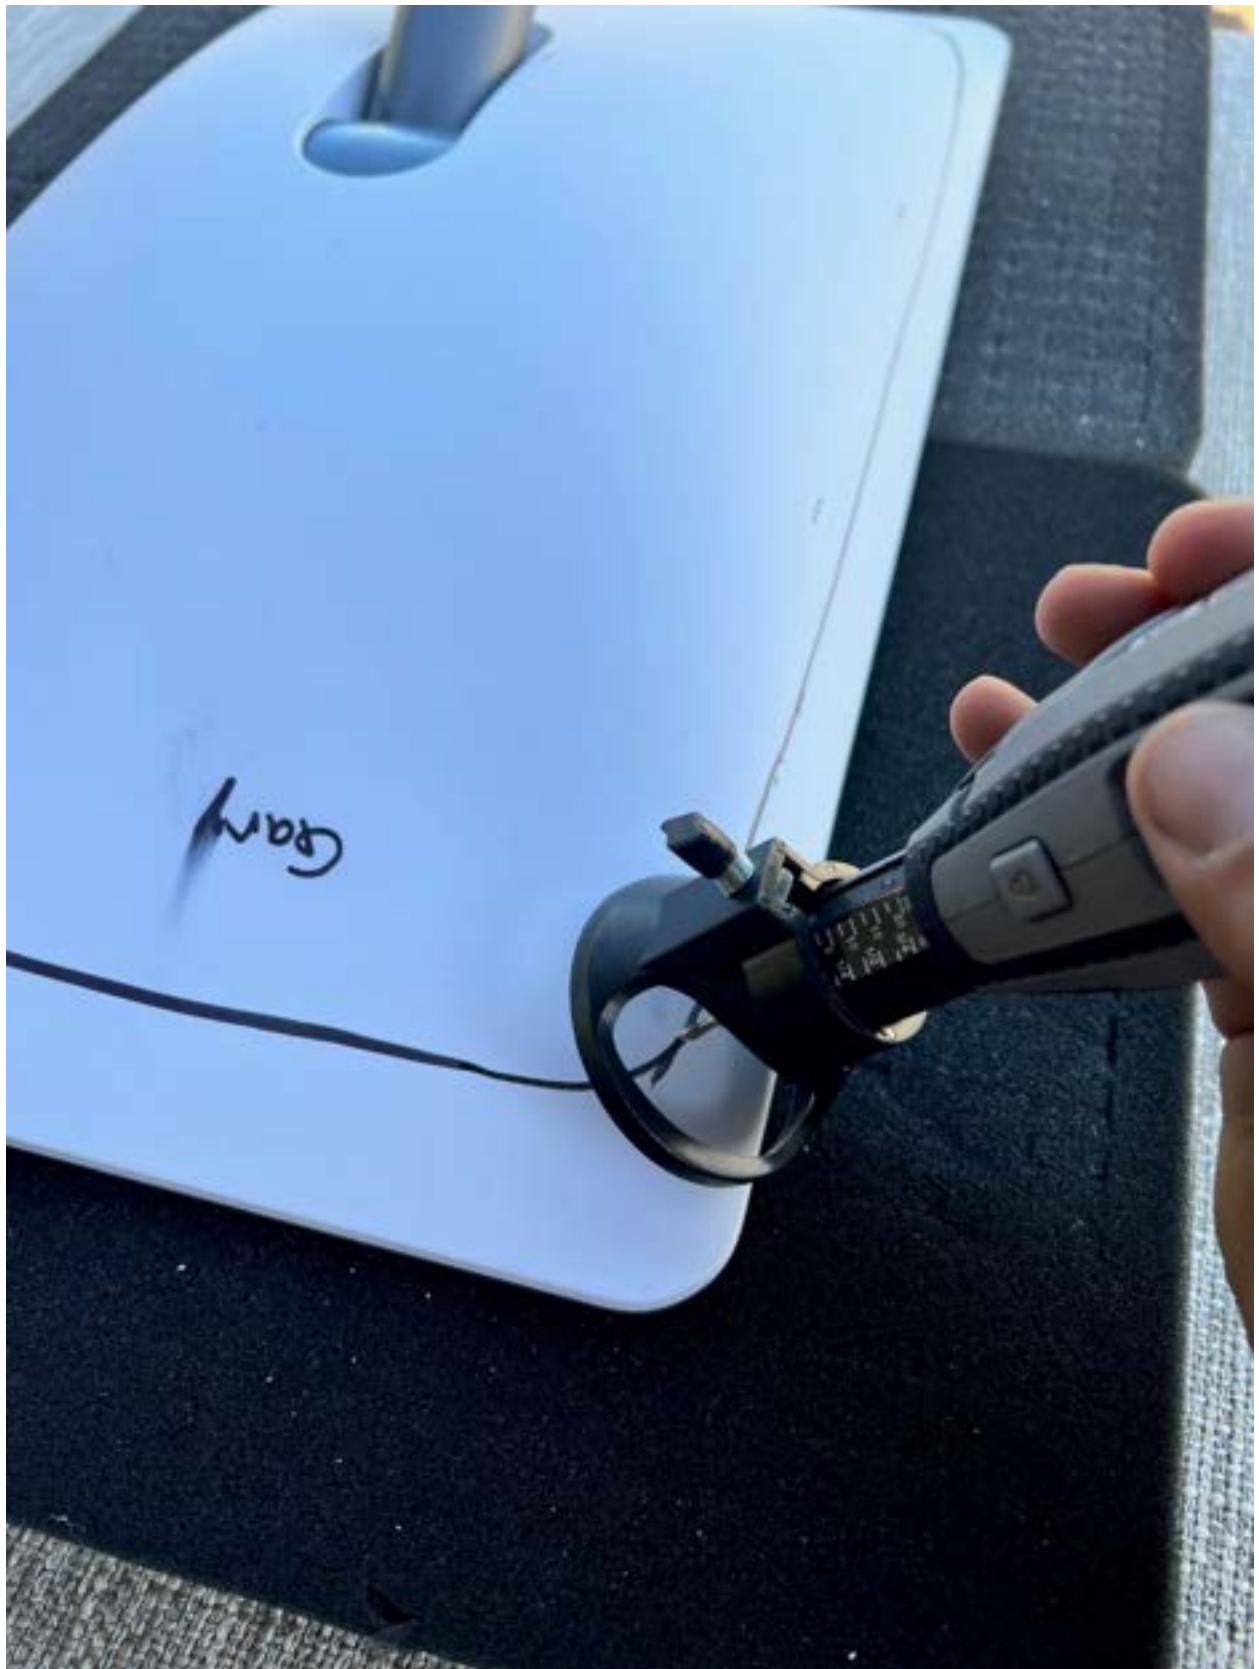

Finish edges by hand. This does not need to be perfect

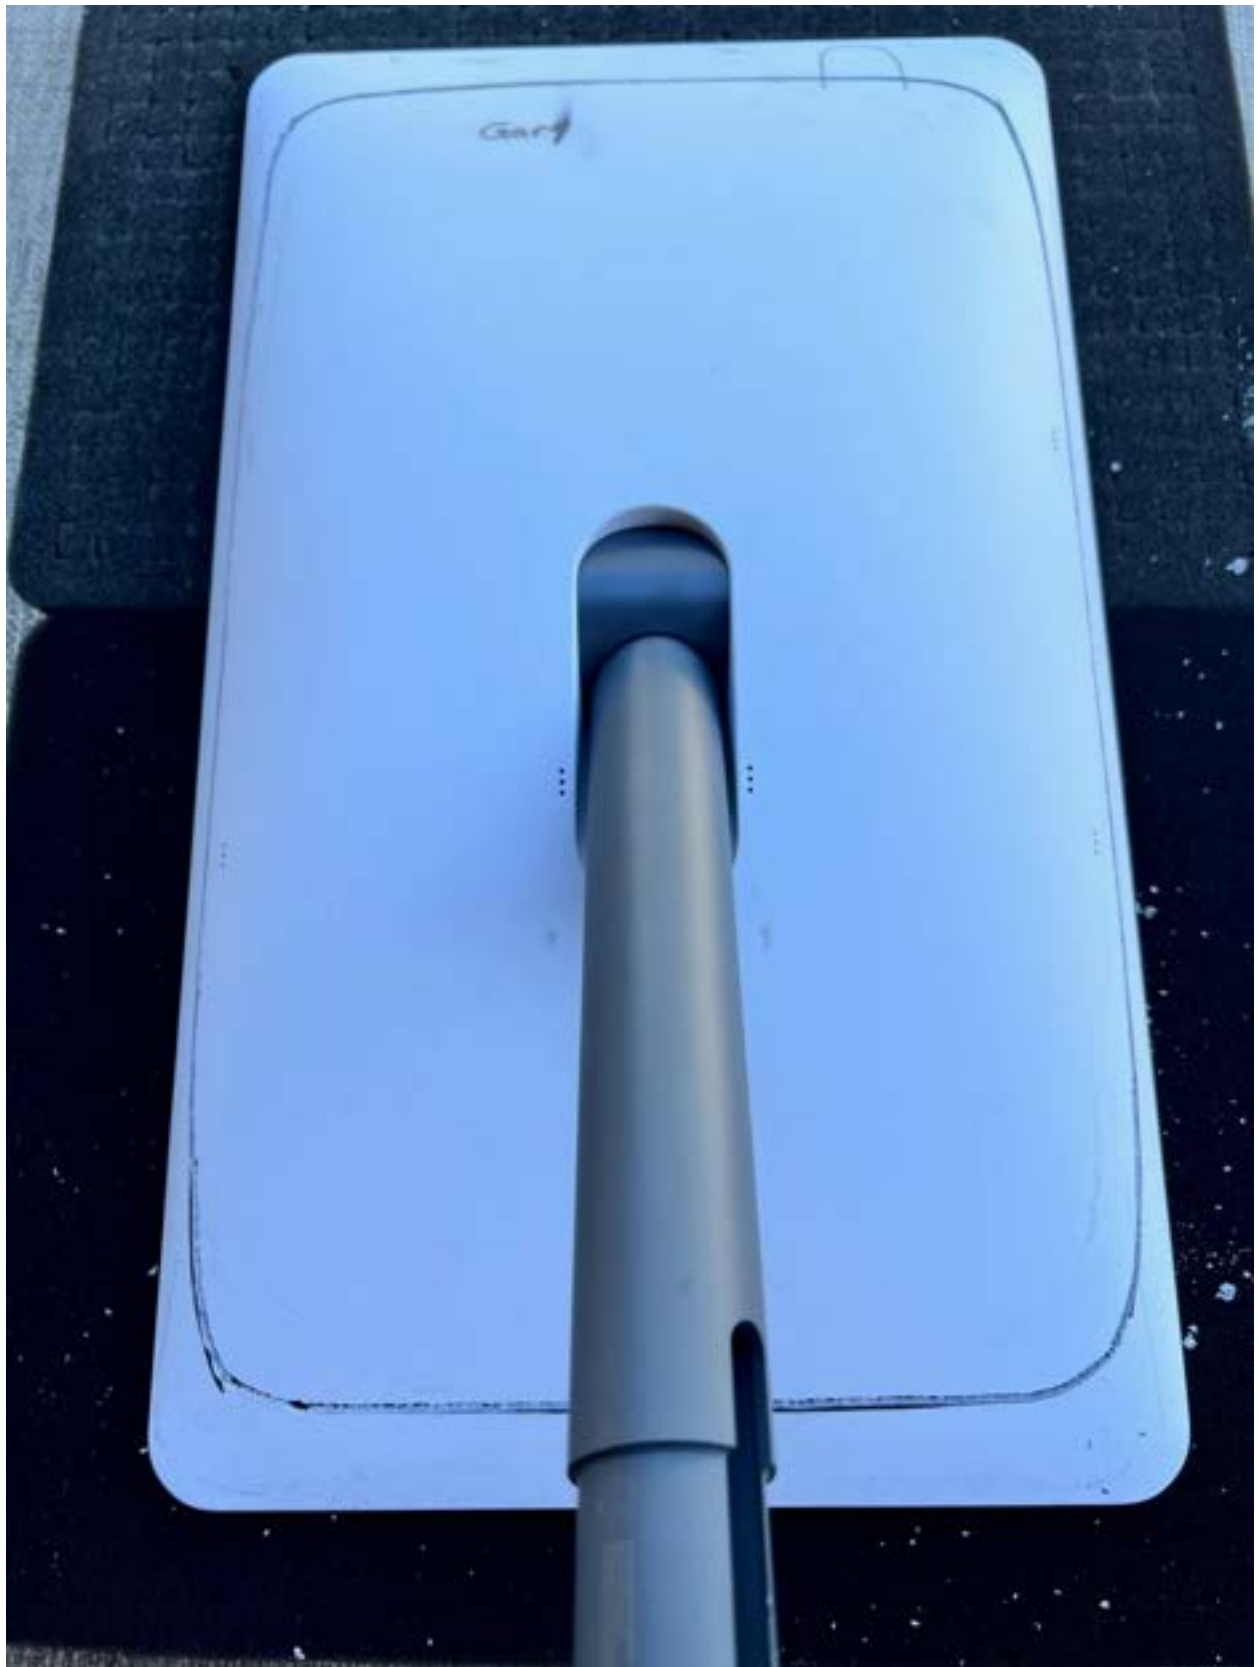

Don't cut all the way through, we will manual remove this in the next step to prevent possible damage to try board!

Push release button with your finger and pry the smaller square with a flathead screw driver. You will be removing this piece from the pole.

If your white wire has this style on it, Simply I clip and move on. If you have the rubber style follow next steps

If you have this rubber style, carefully cut around the rubber, to expose the magnet

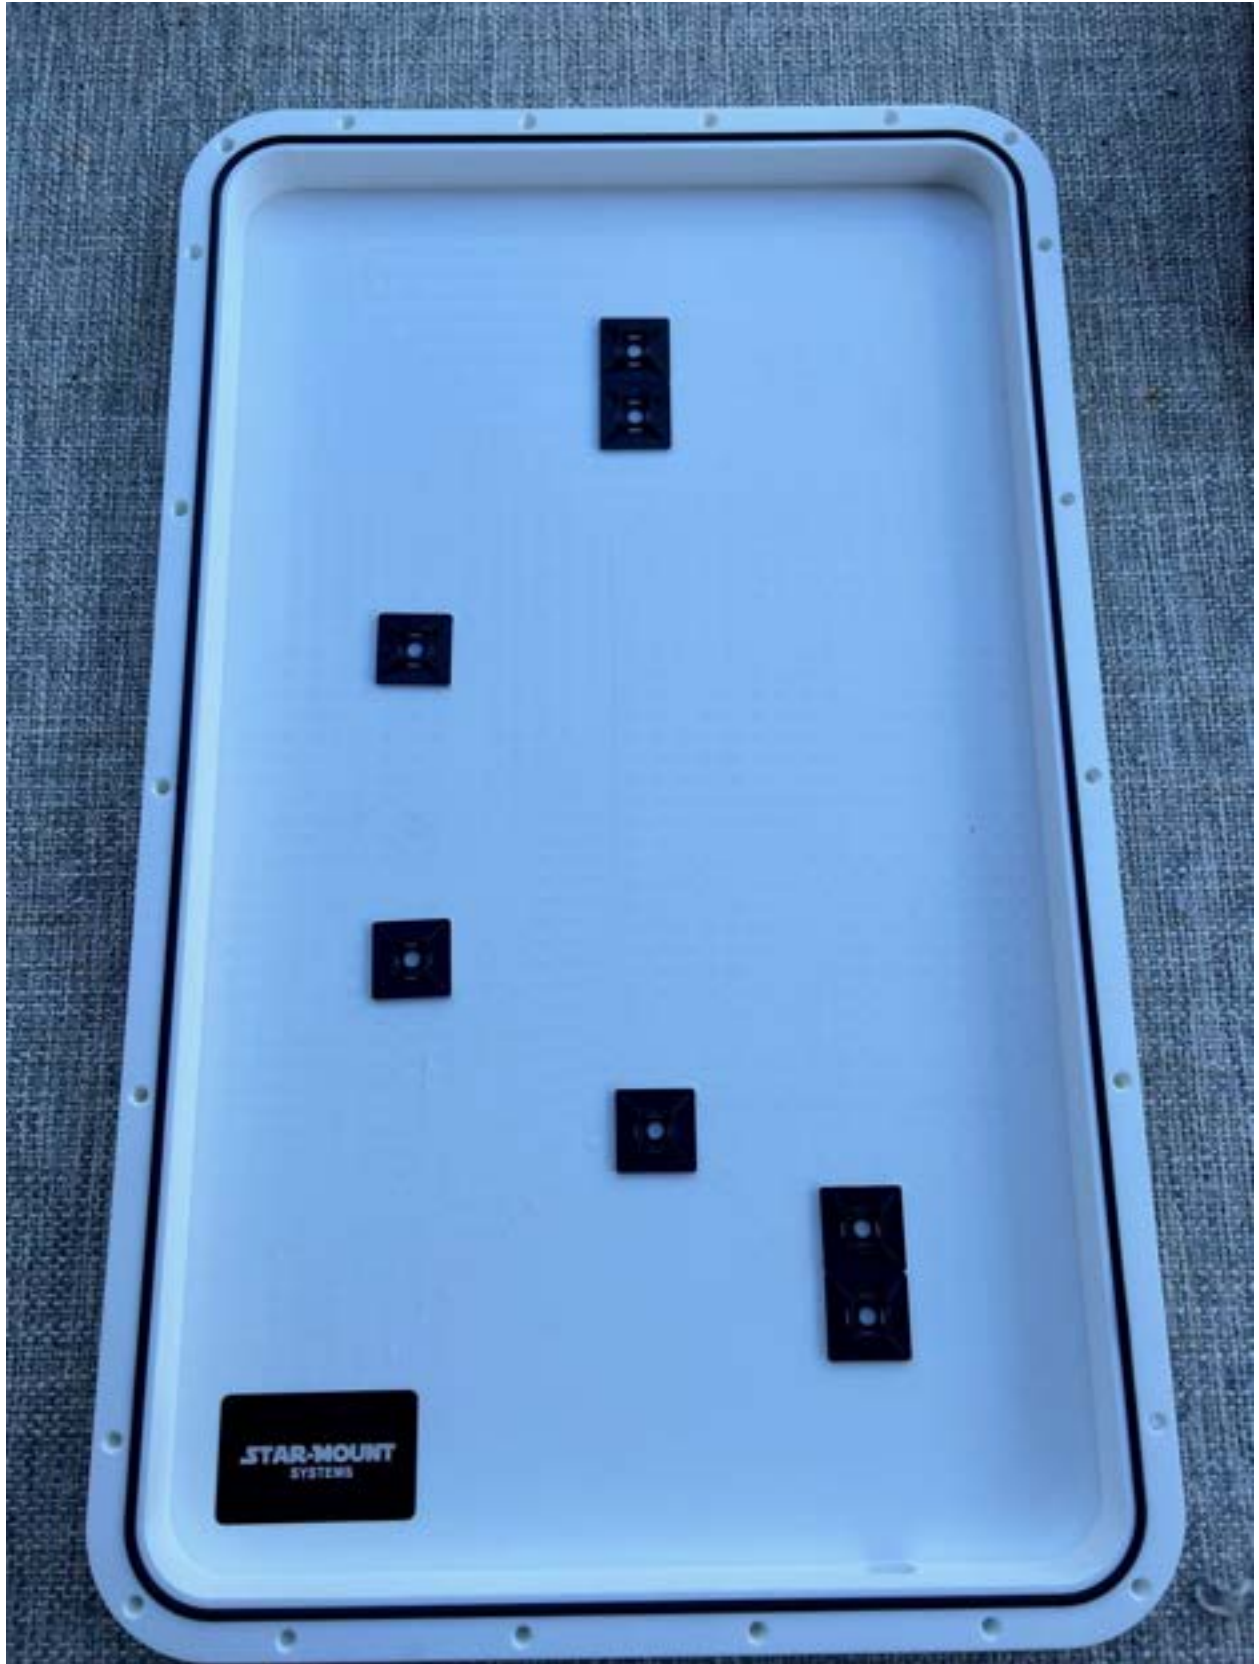

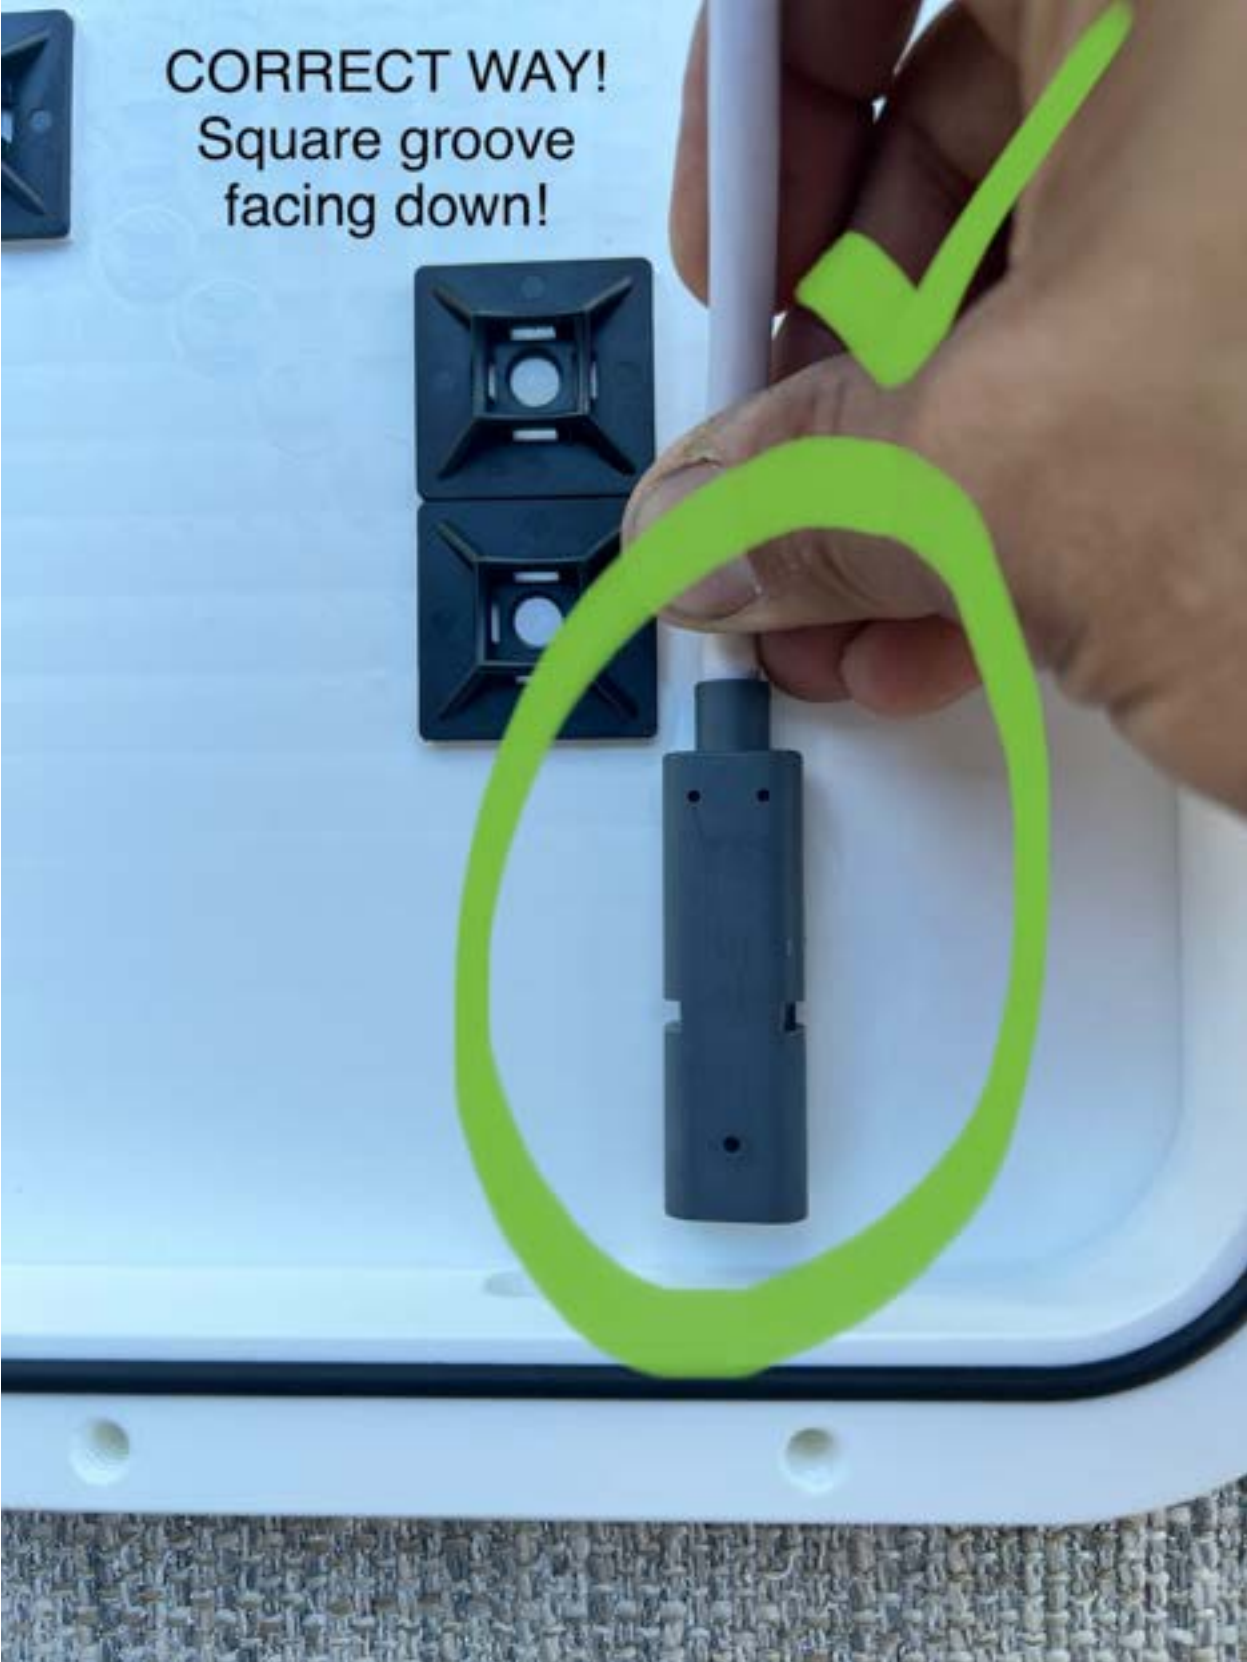

Only requires a gentle tap and the
Magnet cylinder will fall apart

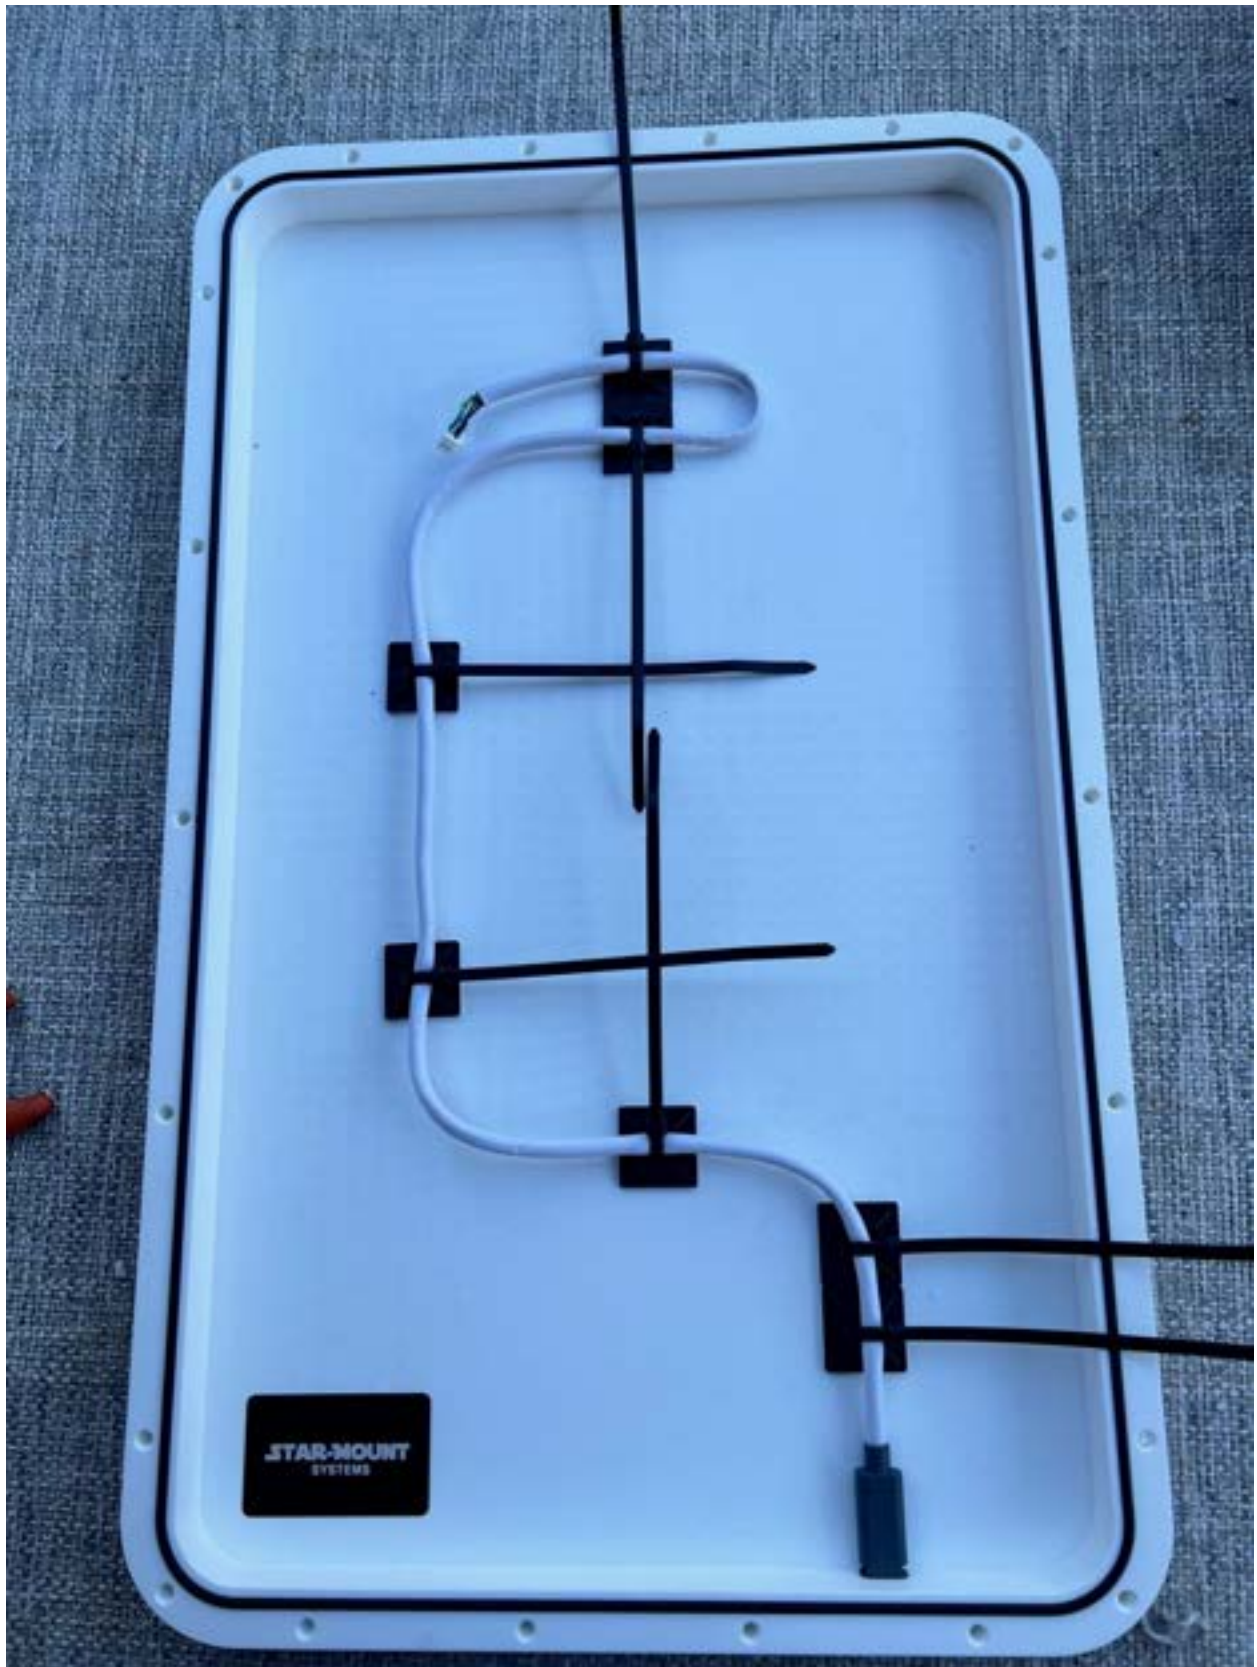

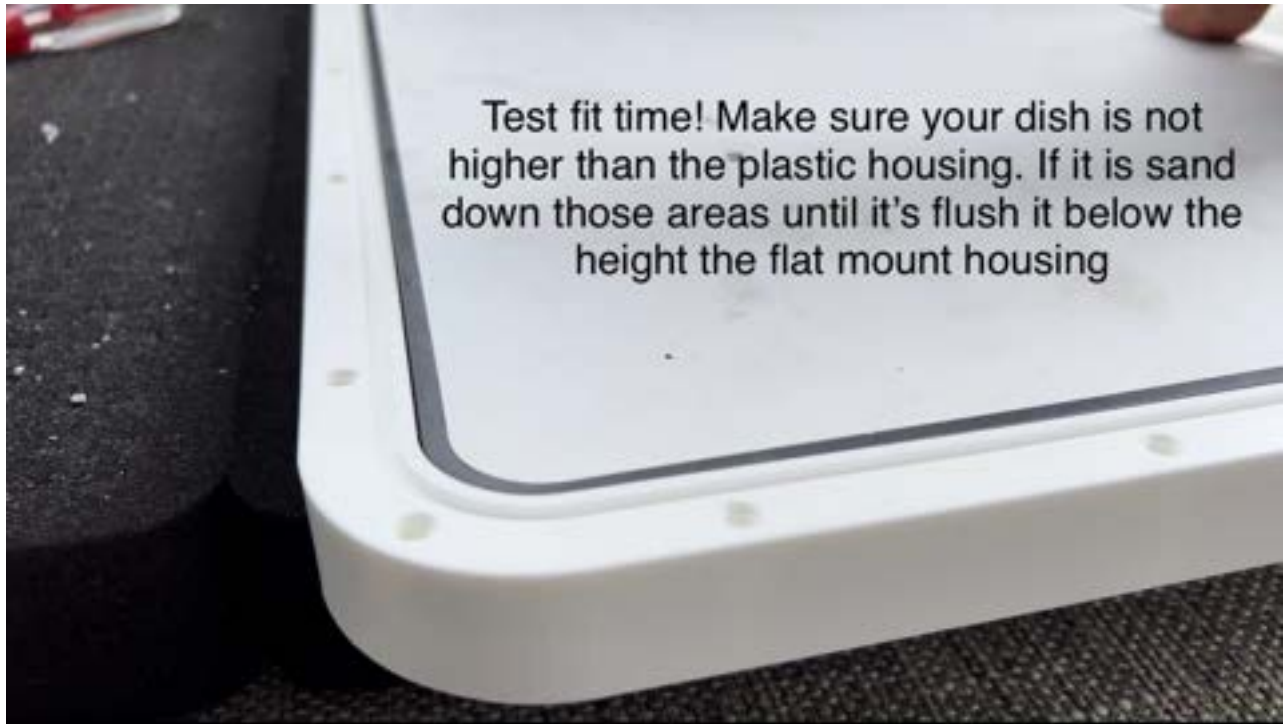

Test fit time! Make sure your dish is not higher than the plastic housing. If it is sand down those areas until it's flush it below the height the flat mount housing

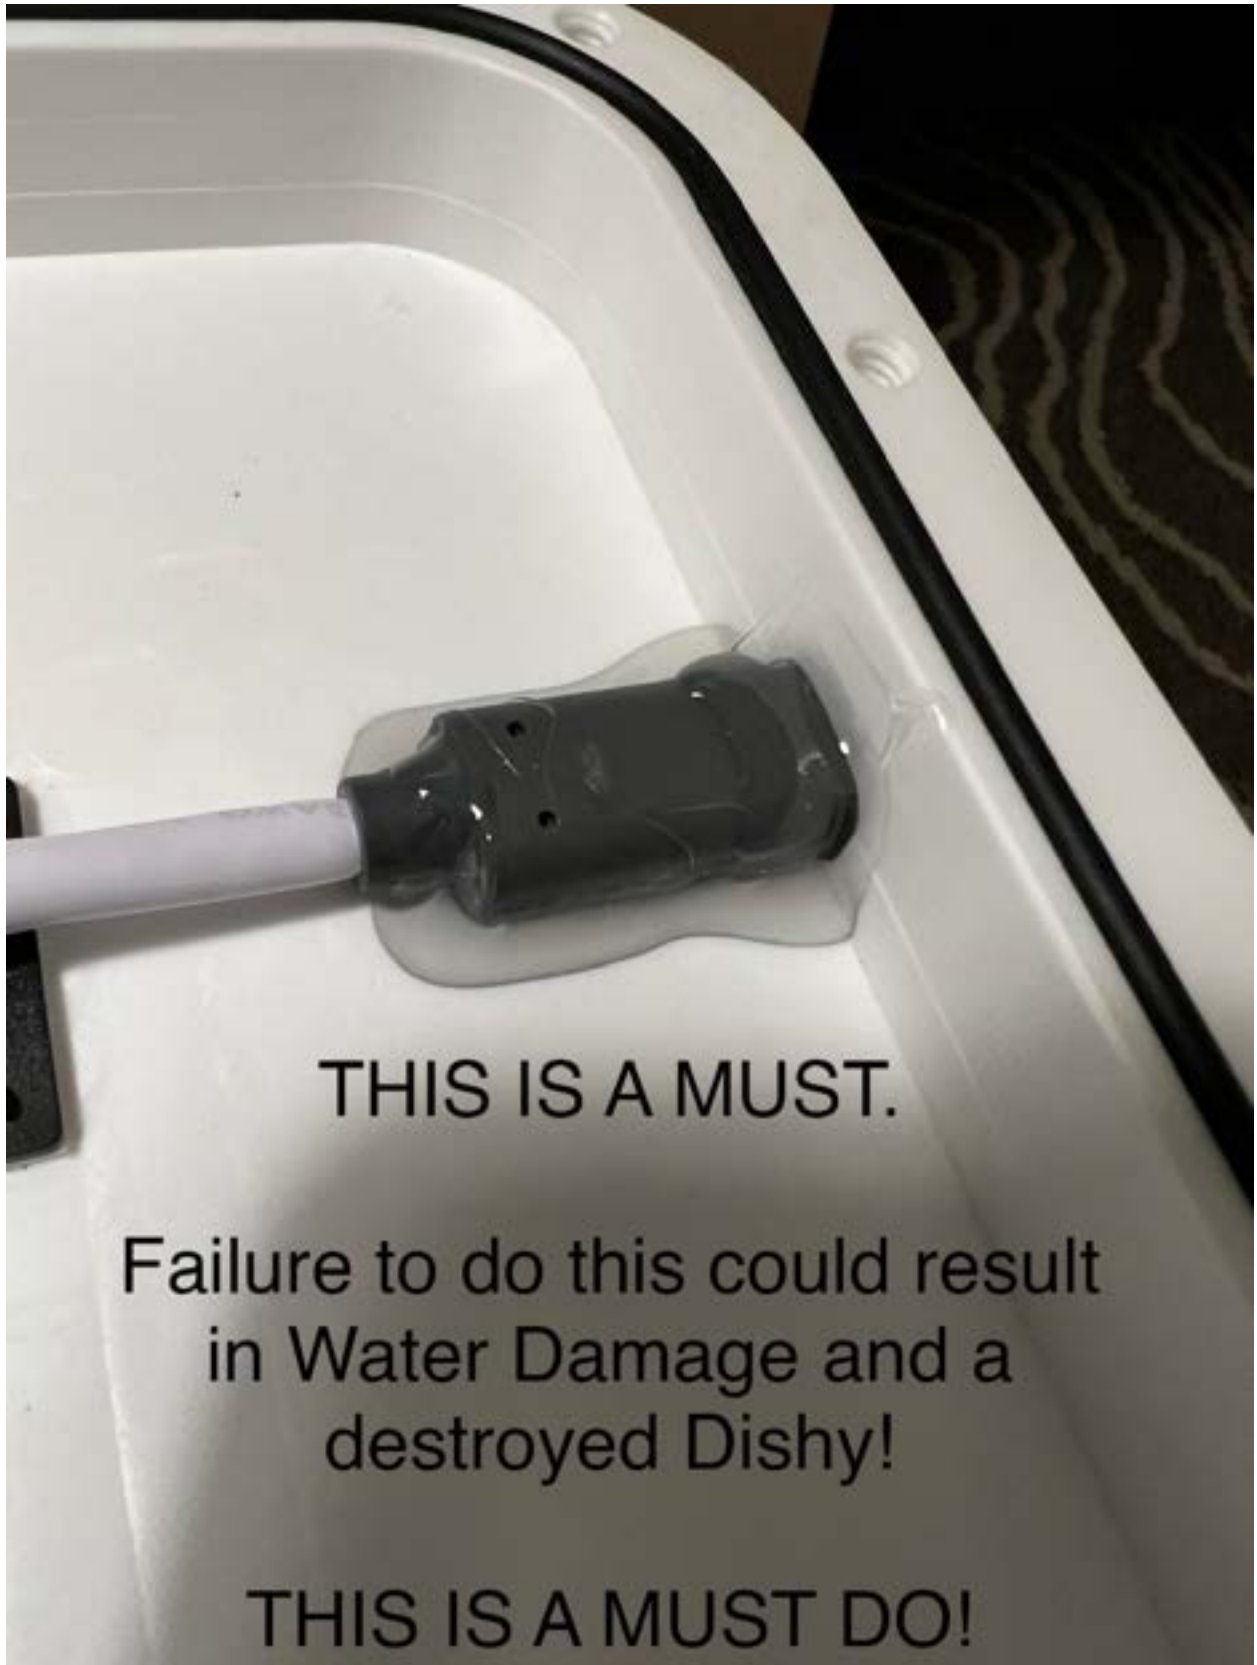

MUST SEAL THIS WITH GORILLA
GLUE CLEAR GRIP

Apple AirTag
Sold Separate

THIS IS A MUST.

Failure to do this could result
in Water Damage and a
destroyed Dishy!

THIS IS A MUST DO!

Make sure all your screws are tight all the way around, and you are DONE!

If you purchased Magnets or Suction cups you will receive 4 longer bolts. These will go in the corners and allow for attachment of your add-on!
