REINFORCED MOUNTING BRACKETS FOR OFF-ROAD USE

Auxiliary Cooling Support Brackets for Grenadier
by Agile Offroad

The factory auxiliary cooling brackets on the INEOS Grenadier are not designed to handle the full weight of the auxiliary coolers when pushed hard off-road. Over time, this can lead to stress and eventual failure. Agile Offroad's powder-coated steel support brackets solve this by adding an extra mounting point, reinforcing the system, and providing the strength needed for heavier use in demanding conditions.
